

Please download the pdf document in the resources section to view the emails you will need to investigate.

In your investigation of the emails, what signs did you find to indicate whether each email was malicious or safe? Give your opinion and analysis on these emails in this document, then upload it as your submission.

Here is an example to use as a reference point:

Example Answer (Please note this is not part of the Task and is an example only. Please remove this section from your task submission):

Is this email Safe or Malicious?	My Analysis
Malicious	 The attached URL is from Russia. The email sender is requesting the user download a file with fairly generic justification. This is enough indicators for us to assume that the link is probably malicious and should be treated as such. Overall the email is not very professional. It is far too generic using terms that could apply to almost anyone and anywhere such as "the report" and the job title of "anz employee". Also 'anz' is not capitalized, and the email provided is not a business email. The name the email uses isn't consistent with the display name. Finally the email tries to instill a sense of urgency and dread by mentioning that the person's job is on the line, and mentioning their bosses to provide some sort of authority to what they are saying. This is a common form of social engineering.

Email 1:

Is this email Safe or Malicious?	My Analysis
Safe	It seems to be a casual email between two friends. It looks
	harmless as the sender is not asking the receiver to download or
	click a link provided that could lead to a malicious website.

Email 2:

Is this email Safe or Malicious?	My Analysis
Malicious	Displayed name is from a russian domain. The message does not
	sound natural based on its' grammar and caps. The signature does not look like it was issued by Microsoft Office365 Customer
	support, and these are enough evidence to suspect the email to be
	malicious.

Email 3:

Is this email Safe or Malicious?	My Analysis
Malicious	The url contains a funny letter. This link might not be to the
	facebook login page that Vinny claims it to be.

Email 4:

Is this email Safe or Malicious?	My Analysis
Safe	The message has initially been issued by info@i.massdrop.com
	which seems to be the manufacturer's email address. Adam has
	forwarded the email without alteration, so therefore this email is
	trustworthy.

Email 5:

Is this email Safe or Malicious? My Analysis

It is difficult to believe that an FBI agent send you an email casually
discussing his classified investigation. Do not allow him for
accessing the email.

Email 6

Is this email Safe or Malicious?	My Analysis
	It seems to be an email between two colleagues. Both their emails
	are from anz domain, and they contain company signature at the
	footer with ANZ logo. From the context, they seem to know each
	other too.

Email 7:

Is this email Safe or Malicious?	My Analysis
Malicious	Displayed name shows Val.kil.ma where as in the content, it claims to be Mike Ferris. Also the provided url contains gibberish.
